EDUCATION & TECHNOLOGY

The Rise of AI Literacy

A New Beginning at ICAN Academy

BY: ICAN SUPERAI

Schools around the world are discovering something exciting. Artificial Intelligence, also called AI, is becoming a helpful partner in learning. Many students and teachers are already using AI tools to help with schoolwork, lessons, and creative ideas. These smart tools can adjust activities to match each student's level, creating personalized learning paths that help children understand lessons more easily and grow their skills step by step.

However, learning about AI is not only about using new technology. It is also about learning how to think carefully, ask good questions, and use technology in a responsible way. Teachers remind students that reading, writing, and critical thinking are still very important. AI should help students learn better, not replace their thinking.

At ICAN Academy, an exciting new program is beginning to help young learners become AI-literate students. This means students will learn how to use AI tools to explore ideas, solve problems, and create meaningful projects. They will also learn about truth, fairness, and responsibility while using technology. By combining creativity, imagination, and digital skills, students can grow into confident learners who are ready for the future world.

"AI should not replace thinking—it should empower it."

The goal is simple. AI should not replace thinking—it should empower it. As AI continues to grow, children who understand it will be better prepared for tomorrow's jobs, inventions, and discoveries. ICAN Academy believes that teaching AI literacy at an early age will help students become:

FUTURE-READY LEARNERS

- Curious thinkers
- Responsible technology users
- Creative problem solvers
- Future leaders

This is only the beginning of a bright new journey for young learners.

NEWS & OPINION

Space Station Crew to Return Early Because of Health Concerns

BY: AHN JAY

The news article, "Space Station Crew to Return Early Because of Health Concerns" from DOGO News, describes an important event. NASA had ordered the space crew to return early. I think NASA's choice was right because it was for astronaut health. This news article is about astronauts returning early because of their health. Even though the International Space Station (ISS) has medical supplies, it lacks the equipment needed for serious illnesses. This is why the space station crew returned early from their mission to space.

I think being an astronaut is very difficult because of potential health problems and the lack of specialized medicine. The article states that the ISS doesn't have equipment and medicine to treat serious medical issues. This makes being an astronaut very dangerous. As I mentioned, being an astronaut is a hard job. Returning the astronauts home was a very good choice. Even though only one astronaut had health concerns, NASA decided to bring home all four astronauts. This was done because of their safety and health concerns. According to NASA's strict safety rules, they must return astronauts who have serious illnesses or bad health conditions. Therefore, by bringing home the seriously ill astronaut, they also helped ensure that the spacecraft was safe from diseases. Bringing the astronauts home was a good choice for everyone's safety.

"Even though the ISS has medical supplies, it lacks the equipment needed for serious illnesses."

KEY TAKEAWAY

NASA's strict safety rules require the return of astronauts who have serious illnesses or bad health conditions—protecting not just one crew member, but the entire team.

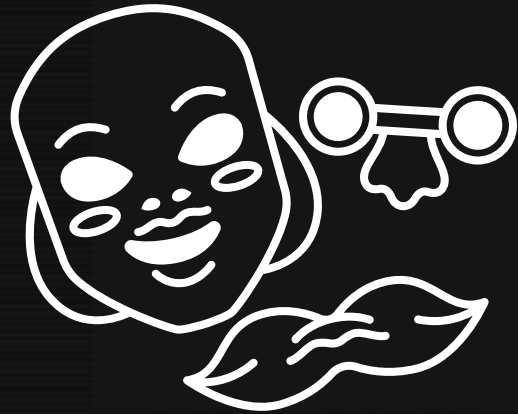

*In conclusion, the article shows that being an astronaut is a hard job due to limited medical supplies. **NASA's decision to bring home the astronauts was a good choice**, as it shows they truly care for their astronauts. Returning to Earth shows that NASA takes care of their astronauts' health and their working conditions.*

OPINION • TECHNOLOGY

FAKEOUT

The deepfake debate — and why it matters.

BY: HAN DONG YUN

As technology gets more advanced, a new debate is emerging: Should the government ban deepfake videos? In the article 'FakeOut' from Time for Kids, journalist Karena Phan explores the dangers of AI deepfakes. The article also highlights concerns about the decline of trust in information and the spread of confusion among netizens. That's why I believe deepfake videos should be legally prohibited.

The article explains why deepfakes are a serious issue. An artificial intelligence expert named Wael Abd Almageed explains that some producers use deepfakes to create fake news on purpose, causing confusion and risking our safety. These videos spread widely online, and a main challenge is their "easy access." You can find them on every major social media platform like TikTok, Facebook, and YouTube.

THE DANGER

"Some producers use deepfakes to create fake news on purpose, causing confusion and risking our safety."

However, individuals can learn to identify deepfakes. Wael suggests we can determine whether a video is fact or fake by observing it carefully. If people have difficulty identifying whether a video is believable before clicking, checking the original source is a useful step. Therefore, it is critical to develop the habit of verifying information before watching.

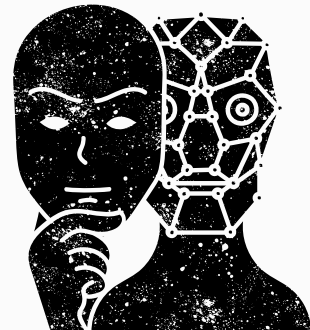

Our society should start to develop a negative view toward deepfakes. If people don't watch these videos, deepfake producers would naturally stop making them. Small changes change the world.

THE SOLUTION

Most importantly, the government should legally prohibit all actions related to deepfakes and enforce strong penalties. Strong laws are the best answer for countering deepfakes.

Misinformation from these fake videos can cause serious conflicts in society. Deepfake producers usually create videos that provoke confusion. Their purpose is to induce netizens to click their videos for view counts. To attract people, exaggerated content is often used. Therefore, I believe strict laws and penalties are important to stop the spread of deepfakes.

In conclusion, while advanced technology offers convenience, the article 'FakeOut' from Time for Kids shows how **deepfakes are dangerous**. As a result, I believe deepfakes should be **legally prohibited**. Deepfakes cause not only confusion but also social conflict due to their easy access and sensational features. Our society should be aware of these harmful actions.

OPINION · PERSUASIVE ESSAY

The Dangers and **DISADVANTAGES** **OF FISHING**

BY: KIM JU WON

01 **PHYSICAL DANGERS**

First, there are many elements of danger. Some fish have horns. For example, the sailfish has a big horn that is used to attack or rush. Also they rush to an object with the big horn. In this case, the sailfish may rush at people and make an injury to them. Another case of danger is that the ocean has plenty of waves. So there are big waves. If the big wave attacks a ship, the wave can sweep a person into the sea. It can also cause the people remaining on the ship to be out of balance. Some of them can bump into objects.

02 **LOW INCOME**

Second, fishing can't earn more than a businessman. Usually, in Korea, the fisherman's income is lower than a businessman. I don't think fishing is a good job for a man who wants to earn much money.

03 **BROKEN BIORHYTHM**

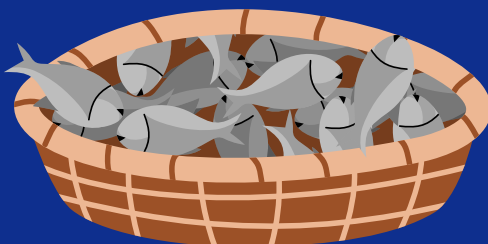

Third, fishing can break a person's biorhythm. To catch fish, a fisherman must wake up early in the morning. Since sleeping is the most important thing in our life, waking up early is not good for our life.

04 **ENORMOUS STRENGTH**

Last, it needs very big strength if there are no machines. Using the net without any machines, fishing needs extremely big power. Because the resistance of the water is too big, it's hard to pull the net, especially for women.

All of these reasons, I think, **fishing isn't a good job.**

PERSONAL ESSAY

Importance of Making *Mistakes*

BY: YEJENE PARK

“ Mistakes are things we do wrong. Many people think mistakes are bad. In school, mistakes can mean low grades. In life, they can make us feel embarrassed. Because of this, people try to avoid making mistakes. But mistakes are actually very important. They help us learn and grow. ”

. . .

When we make mistakes, we learn from them. For example, if I fail a test, I can study harder next time. If I say something wrong to a friend, I learn to be more careful with my words. Mistakes help us understand what we are good at and what we need to improve. They also make us stronger because we learn not to give up.

Mistakes also help us discover new things. Many inventions were made after people failed many times. If they gave up after one mistake, nothing new would be created. Trying again and again helps people succeed.

Mistakes are not something to be ashamed of. They are part of learning.

In conclusion, mistakes are not something to be ashamed of. They are part of learning. Instead of being scared of mistakes, we should accept them and use them to become better. Mistakes help us grow into stronger and smarter people.

LANGUAGE & CULTURE

Hangeul, A Scientific *Masterpiece*

BY: HAN DONG YUN

How was Hangeul created? Unlike many writing systems that developed slowly over time, Hangeul was carefully and intentionally designed. Before Hangeul, Koreans used Chinese characters, which were very difficult to learn and understand. Because of this, many ordinary people could not read or write, leading to widespread illiteracy. Later, Hangeul received global praise for its design. Jared Diamond even called it "the most rational writing system." In this presentation, we will explore the excellence and hidden secrets that make Hangeul a true scientific masterpiece.

창제 정신

The Three Spirits

- **Independence:** Korea's own writing system.
- **Practicality:** Easy to use in daily life.
- **Love for the People:** Education opportunities for everyone.

자음의 과학

The Science of Consonants

- **Mimicry:** Designed after vocal organs (tongue, throat, etc.).
- **Examples:** 'ㄱ' (throat), 'ㄴ' (gums).
- **Adding Strokes (Gahoeop):** Stronger sounds = adding a line (ㄱ → ㅋ).
- **Benefit:** Logical and easy to memorize.

모음의 철학

The Philosophy of Vowels

Three Basic Symbols (Cheon-Ji-In):

Principle: Combining shapes to represent the harmony of the universe.

附

Conclusion

- **Summary:** A masterpiece created from science and love.
- **Global Status:** Worldwide fame for its logical system.
- **Final Message:** A great gift showing the wisdom of Korea.

"Hangeul is the most rational writing system in the world."

CULTURE & HISTORY

The Secret History of the *Dreidel*

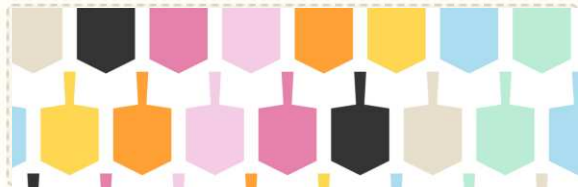

BY: HAN JU YI

The dreidel is more than just a toy; it is a famous symbol representing the miracle of Hanukkah. While it is a source of joy today, it once served as a clever tool to help people hide their traditions during a time of great danger.

THE TRADITIONS OF HANUKKAH

Hanukkah, known as the "Festival of Lights," is a joyous eight-day holiday celebrated in late November or December. Jewish people celebrate by lighting candles on a menorah—adding one for each night—to mark the progression of the holiday. After the lighting, families recite blessings and sing traditional songs. Food plays a central role in the celebration. Fried foods, such as potato pancakes called latkes, are eaten to honor the miracle of the oil. After the meal, families exchange gifts and play the traditional Jewish game of dreidel.

THE MIRACLE OF THE OIL

After three years of fighting, the Jewish people reclaimed their Temple in 165 BCE. Upon entering, they found only a tiny jar of sacred olive oil—barely enough to keep the menorah burning for a single day. Miraculously, the oil lasted for eight full days, providing enough time to prepare a fresh supply. To commemorate this miracle, they established the holiday of Hanukkah, which means "dedication" in Hebrew.

A HISTORY OF RESISTANCE

The origins of this story date back over 2,000 years. At that time, the Greek King Antiochus IV ruled the land and outlawed the practice of the Jewish religion. He even desecrated the holy Temple by placing forbidden animals inside. During this period, Jewish people were forbidden from studying the Torah. To keep their faith alive, they studied in secret. Whenever Greek soldiers approached, the people would quickly hide their scrolls and pretend to be playing a game with the dreidel to avoid arrest.

THE MODERN GAME

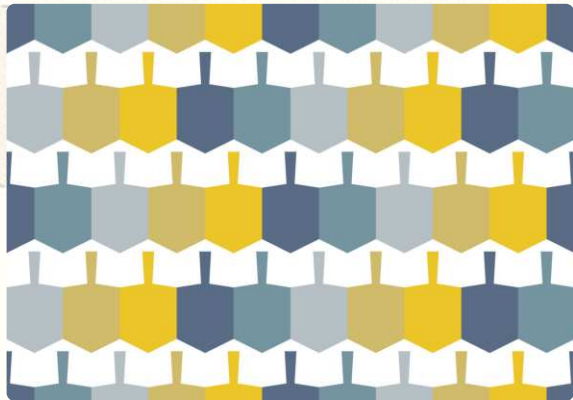

Nowadays, children play the game to win gelt, which are chocolate or real coins. Each side of the spinning top features a Hebrew letter that contributes to a secret message.

The letters on the dreidel change depending on where you live. For those living inside Israel, the letters translate to "A great miracle happened here." However, for those living outside Israel, the letters translate to "A great miracle happened there."

A LEGACY OF COURAGE

The dreidel serves as a constant reminder of a historical miracle. It honors the bravery of a people who protected their traditions even when it was dangerous to do so. Regardless of one's faith, the story of the dreidel teaches us the value of hope, courage, and respect for history.

The story of the dreidel teaches us the value of **hope, courage, and respect for history.**

KOREAN TRADITIONS

Lunar New Year's Day

설날

BY: MOK MIN JUN (SAMMY)

Lunar New Year is one of Korea's major holidays. It is a meaningful time when people bow to their elders to show respect, have joyful family gatherings, and share traditional meals together. On this day, we sincerely look forward to new blessings and good luck in the coming year. In Korea, we enjoy many kinds of special foods and games with our relatives.

TRADITIONAL FOOD

A famous food is rice cake soup, which people eat to celebrate growing one year older. My favorite treat is yagwa because it is sweet and very yummy.

FUN GAMES

We also play fun traditional games that make the holiday exciting. The most famous game is Yutnori, and I also like to play jegichagi with my family.

NEW YEAR'S MONEY

Another exciting part is that we get New Year's money, which makes the celebration even more special and memorable!

On this day, we sincerely look forward to new blessings and good luck in the coming year.

WORLD POLITICS

Greenland

The biggest island, the biggest controversy.

BY: AHN JAY

Did you know that a president once wanted to buy Greenland? Greenland, also known as the biggest island on Earth, is located near the Arctic and Canada. It is officially known as a part of Denmark, but it mostly runs its own government. However, Denmark handles Greenland's relationships with other countries. I read an article on BBC Newsround about how President Donald Trump wanted the United States to own Greenland. He believed that it would help keep America secure. The article talked about why the U.S. wanted Greenland, how Denmark said no, and how other countries supported Greenland. President Trump was quoted in the article saying, "The world is not secure unless we have complete and total control of Greenland."

THE U.S. POSITION

Trump said the United States needs Greenland for its national security and to be better positioned against Russia or China. He felt America needed Greenland for its national security. He thought it could protect the U.S. from Russia and China.

"The world is not secure unless we have complete and total control of Greenland."

— PRESIDENT TRUMP

Trump said the Arctic is a very important and strategic place. He didn't think Denmark was doing enough to protect Greenland from China and Russia. So he wanted the U.S. to be Greenland's protector. To make this happen, he suggested buying Greenland or having the American military take control.

DENMARK & GREENLAND

Denmark and the people of Greenland did not agree. They said, "Greenland is not for sale." They believed Greenland's future should be decided by Greenland and Denmark, not the United States.

Denmark's Prime Minister, Mette Frederiksen, rejected the idea of selling Greenland. Greenland's prime minister, Jens-Frederrick Nielsen, also said they would prefer Denmark rather than join the U.S.A. Some were upset with the U.S. for trying to take over Greenland.

INTERNATIONAL RESPONSE

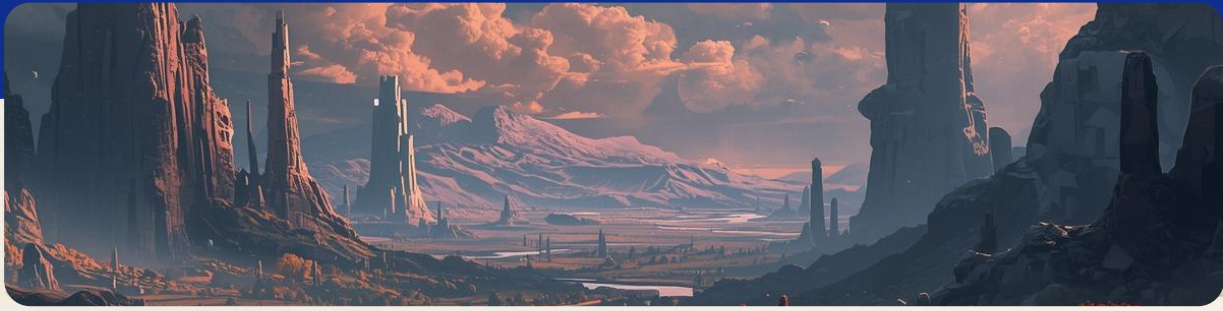

This hurt the friendly relationship between the U.S. and some European countries. At this time, the European Union, including the UK, showed their support for Denmark to ensure that China or Russia would not gain a position on Greenland.

This news article is mainly about Trump wanting Greenland for security reasons, Denmark's feelings, and what other leaders thought. This was because Greenland is a strategic and important place. Greenland was worried about being bought, and other leaders were angry and protected Greenland.

"Greenland is not for sale."

— DENMARK & GREENLAND

Even though President Trump thought taking Greenland would make the world safer, the people of Greenland did not agree as they decided they want to decide among themselves as a free nation.

NARRATIVE ESSAY

ECHOES OF AN ALIEN PLAN

BY: KIM JI YONG (ETHAN)

A solitary figure, seemingly bound for an unknown destination, walks across rocky and rugged terrain covered with lush grass and scattered wildflowers. As he approaches a colossal mountain whose towering peak frames the horizon, he is overwhelmed by its breathtaking beauty. He pauses, a profound sense of awe washing over him.

He is a soldier, the sole survivor of a brutal battle in which all his comrades were lost. Burdened by overwhelming guilt for failing to save them, he is often tempted to take his own life. At one desperate moment, as he prepares to end everything, he hesitates and reluctantly drops the knife to the ground. Choosing to live, he presses forward, determined to find his way back home despite the countless hardships that lie ahead.

The mountain path is steep and winding, draining his remaining strength with every step. After narrowly escaping a valley that feels as threatening as a devil's lair, he encounters a tranquil, crystal-clear river winding between enormous mountains.

Unsure how to cross, he attempts to swim but quickly realizes the river is far deeper and stronger than he expected, forcing him to turn back. While searching for another solution, he discovers an abandoned raft lying near the riverbank. With renewed hope, he decides to repair and use it to cross. Just as he is about to step onto the raft, the once-silent river begins to tremble. A massive presence rises from the water—beings that resemble aliens.

Startled, he hides behind a tall tree with a thick trunk and secretly observes them using an advanced device that translates alien language into English. Through this device, he overhears their plan to conquer the United States of America, the country where he was born and raised. Unbeknownst to him, the aliens have already sensed a human presence nearby, yet the man mistakenly believes himself to be Earth's savior. He imagines being honored as a hero, receiving recognition from the United States government for preventing the invasion.

"He imagines being honored as a hero... yet the aliens have already sensed a human presence nearby."

After the aliens disappear, he begins his journey to America and eventually fulfills his long-held dream of returning home. He reunites with his beloved girlfriend, close friends, and parents before running through the streets of Washington, D.C., a city that remains crowded and vibrant. He delivers the information he gathered to the White House, and the nation's leaders trust his account and begin planning a large-scale response based on his warning.

However, events unfold disastrously. The aliens' true plan succeeds, allowing them to conquer Europe after the United States orders allied nations to send their armies to America.

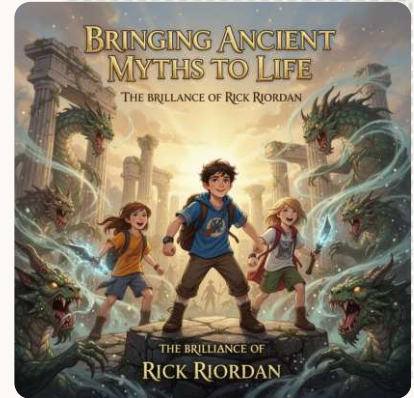

Overcome with guilt once more, the man realizes his mistake—he should not have accepted the information without question or acted without doubt. Because of his misjudgment, Earth falls into the grip of the aliens and ultimately becomes their colony.

— END —

Bringing Ancient Myths to Life

The brilliance of Rick Riordan.

BY AHN JAY

Popular book series have the power to captivate readers of all ages, sparking imaginations and creating unforgettable worlds. For most, it is Harry Potter. But for me, it is the Percy Jackson series. The series was written by Rick Riordan. Rick Riordan was born on June 5, 1964, a day that marked the arrival of one of the greatest authors for young readers. Rick Riordan is considered one of the best teen authors because he uses mythology, well-developed characters, and a great sense of humor in his stories.

MYTHOLOGY MODERNITY

MEETS

Rick Riordan makes his writing relatable by combining ancient mythology with the modern world. This writing style matters because it transforms old, complex myths into something young readers can easily understand and connect with, making mythology feel alive instead of distant.

For example, Riordan often reimagines mythological figures in modern settings, such as portraying Ares, the god of war, riding a motorcycle or placing Olympus in the Empire State Building. By relating legendary beings and places in familiar, everyday locations, Riordan helps readers feel like magic could exist in the real world they live in. Therefore, by updating ancient stories and settings, Riordan creates a world that feels both legendary and personally meaningful to his audience.

"Riordan creates a world that feels both legendary and personally meaningful to his audience."

CHARACTERS DEPTH

WITH

Beyond the magic, Riordan captivates readers by creating three-dimensional, well-developed characters. This is important because characters with flaws and growth allow readers to genuinely connect with them, instead of just watching perfect heroes battle monsters.

A strong example is how Riordan based the Stoll brothers on two real students he once taught, making Travis and Connor mischievous, loyal, and full of personality. Their humor, troublemaking, and sibling bond feel authentic because they are inspired by real people. By giving his characters real emotions, weaknesses, and attachments, Riordan makes them relatable individuals. Ultimately, these complex personalities deepen the emotional impact of the story, making the books about more than just quests—they're about people.

HUMOR & HEART

Finally, Riordan's writing style is shaped by his constant use of humor and sarcasm. This humor is important because it lightens the tension of the dangerous adventures

and keeps the story fun and easy to read for young readers.

For example, he uses playful humor throughout his books, such as in his iconic chapter titles like "I Accidentally Vaporize My Pre-Algebra Teacher," which instantly sets a comedic tone even though monsters and life-or-death moments are ahead. These jokes work because they show that, despite the chaos around him, Percy is still a relatable, funny teenager who uses humor to cope with fear. In conclusion, this humor is the secret ingredient that makes Riordan's stories exciting, engaging, and irresistibly readable.

"Rick Riordan is a world-builder, a creator of relationships, and a source of humor."

Overall, Rick Riordan is a world-builder, a creator of relationships, and a source of humor. He creates worlds beyond what we can imagine. With well-developed characters, humor, and a universe of ancient Greek mythology, Rick Riordan has crafted a complete and well-balanced book series. Rick Riordan's writings can inspire and introduce a whole new world to others.

VOCABULARY STORY

Stella's Adventure

By: Kim Ra-I

VOCABULARY

- vicious
- meticulous
- imagination
- plenty
- adventure
- serene
- stable
- creative

~ Once upon a time ~

There was a girl named Stella who was meticulous and serene. She liked to plan carefully and enjoyed peaceful days. One day, she decided to go on an adventure to explore the world.

Suddenly, a paper dropped from the sky.

THE MYSTERIOUS NOTE SAID:

"You need to use your imagination."

Stella walked and walked, thinking of creative ideas as she traveled. Soon, she stopped because a bridge appeared in front of her. The bridge looked vicious and broken, so she began to hesitate.

Stella's Adventure

After thinking carefully, she used her creativity and built a stable bridge. She crossed safely and continued her journey. A few minutes later, she saw beautiful scenery all around her.

In the end, her travel had plenty of adventure, learning, and happy memories.

COMEDY STORY

A VERY CONFUSED CHICKEN

The Story of Bobo

By: Kim Ra-i

One day, a chicken named Bobo was walking in the park very happily and laughing loudly. He saw a banana in a tree and said:

BOBO
"Wow! Bananas are flying today!"

Bobo tried to jump, but he slipped and fell down on the grass.

SPLAT! **GRASS**
"Hello, chicken. You are sitting on my face."

The chicken was surprised, so he pooped on the grass face. The grass cried loudly and yelled at him. Because he was angry, he poked his sharp grass into chicken's butt.

Then, chicken ran away from the grass. Bobo ran away very fast while shouting:

BOBO
"Sorry, grass! I did not mean to poop on your face!"

His feathers were shaking, and his legs were running in the wrong direction.

Suddenly, Bobo bumped into a sleepy turtle wearing sunglasses.

TURTLE
"Please look where you are going. I am having my walking nap."

BOBO
"I am sorry, Mr. Turtle. The grass attacked my butt!"

TURTLE
"That is why I never sit down."

Then a monkey appeared, laughing and eating popcorn.

MONKEY
"This is better than chicken TV!"

Bobo felt embarrassed, so he hid behind a trash can and sighed.

BOBO
"I just wanted a banana."

At that moment, the banana fell from the tree and landed on Bobo's head. Everyone laughed, even the grass.

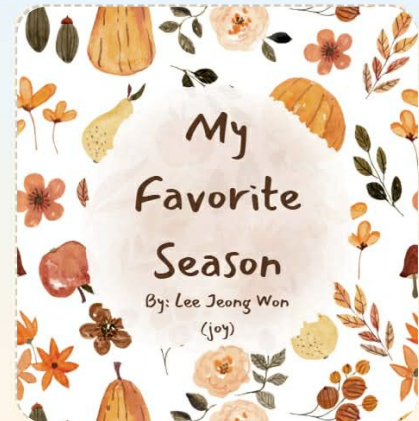

BOBO
"Next time, I will just eat corn."

~ THE END ~

POETRY

My Favorite Season

By: Lee Jeong Won (Joy)

Stanza 1

The sky is blue, the sun peek thru,
Leaves are red and, yellow, too.
I run and play with my friend today.
Autumn time is fun, hooray!

Stanza 2

The wind blows strong and leaves fly.
I see birds that fly up the sky.
My friend and I laugh and jump all day.
Autumn makes me happy to play.

Stanza 3

My jacket is warm, but shoes are wet,
I don't know and I want to forget.
The rain comes fast and sun goes hide.
Autumn is fun on every side!

Autumn is fun on every
side!

POKÉMON POETRY

THE GIANT GENGAR

BY: MOK MIN JUN (SAMMY)

When I was filled with anger
 I saw a **GIANT GENGAR**
 Its color was purple
 And it spun in circle
 It made a shadow ball
 And threw it like a volleyball
 I like it because it's cool
 But it's sometimes like a giant **GHOUL**
 It threw its shadow ball
 But I dodged it and threw a Poké Ball.

FAREWELL POEM

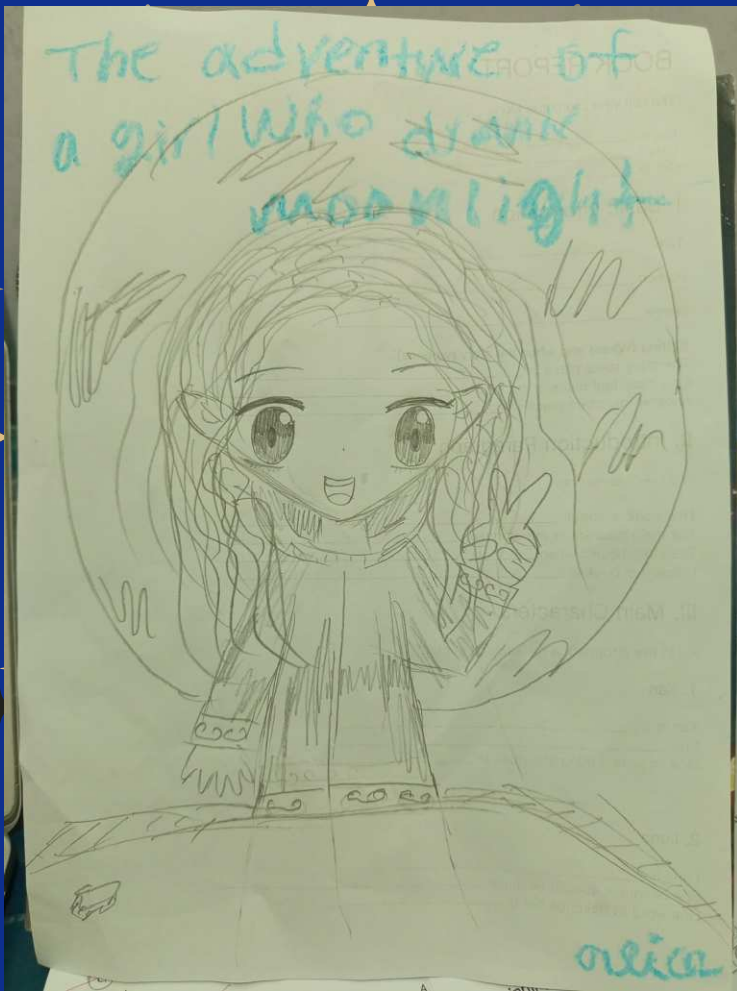

For T. Min

BY: KIM JI YUN

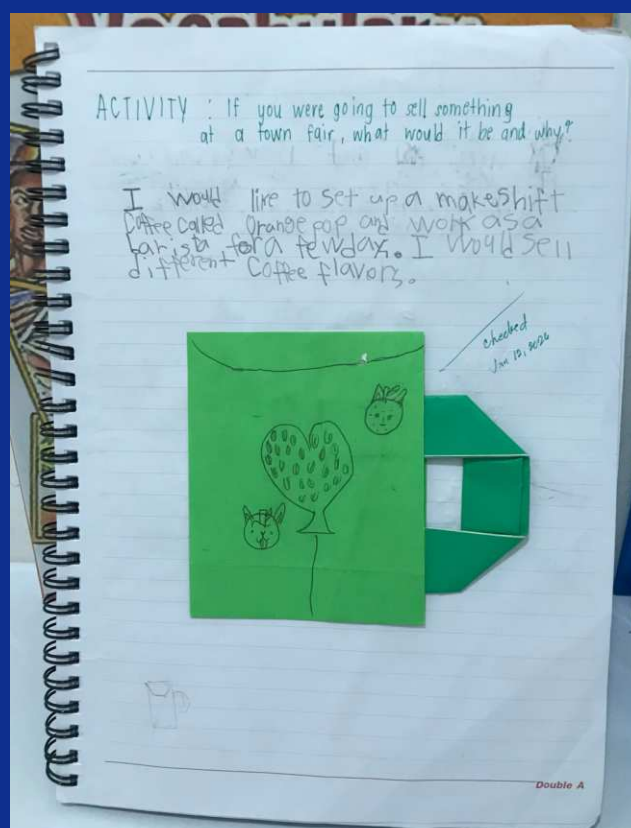

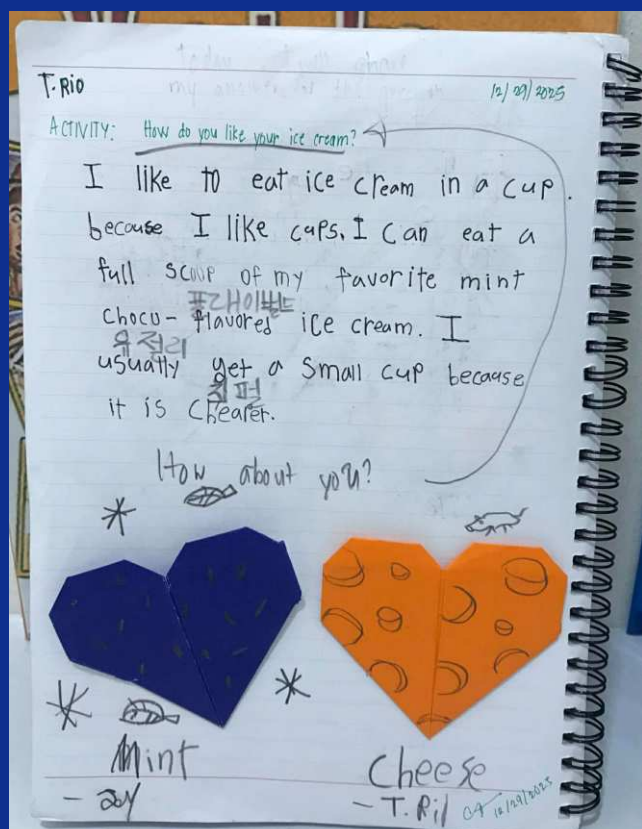

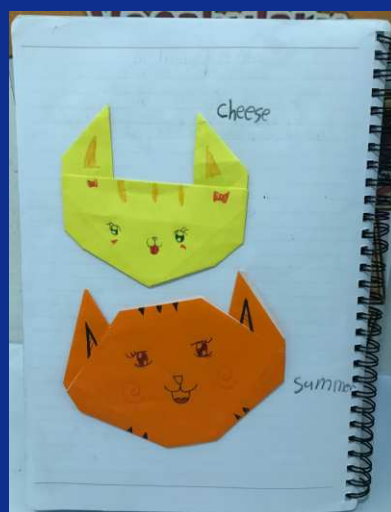

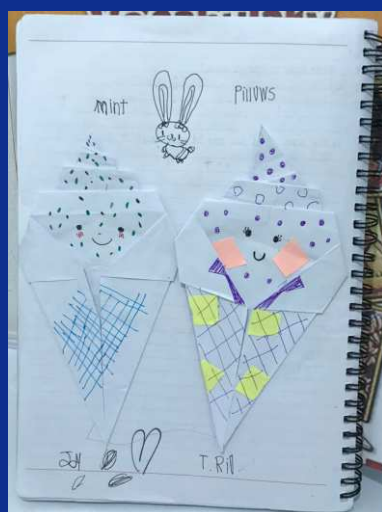

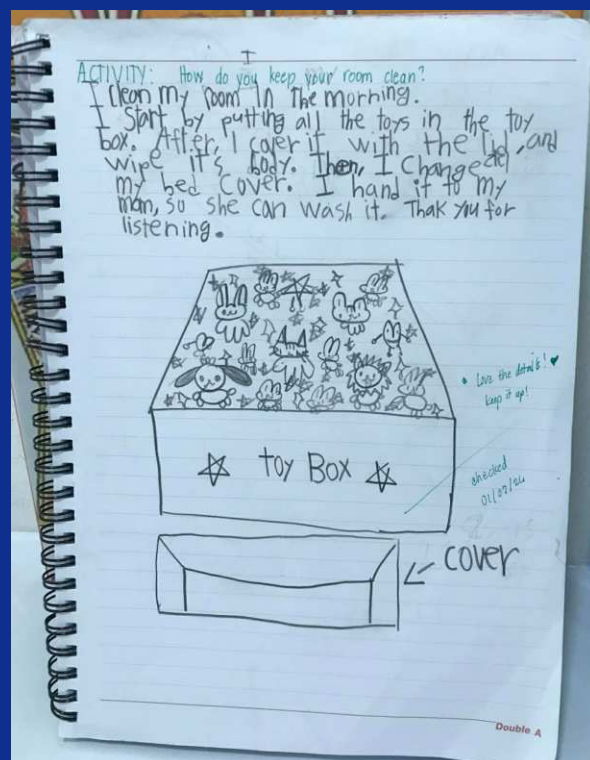

T. Min listened when I **needed** a voice,
 She heard my thoughts, she understood my **choice**.
 She knew how I felt without
 Reading the truth in a greet or sigh.
 She supported **everything** I tried to do,
 Standing beside me, **steady** and true.
 Fun and smiles, with a light to share,
 She made me feel seen, **never alone**.

Through laughs and talks, both big and small,
 She was there to **catch me** if I fall.
 Now this chapter ends, the page turns slow,
 But endings don't mean we won't meet, I **know**.
 Someday – just not in this chapter, it seems –
 We'll meet again, **grateful** for every moment,
Strong and brave.

LEE JEONG WON'S MASTERPIECES FROM T. KRISTAL

LEARNING I S POWER

As the famous Philosopher, Francis Bacon said "Knowledge is Power, which means that learning gives people the ability to control their lives and achieve their goals." And another of his famous quote is, "Knowledge is power". After I read that sentence, I thought knowledge is one of the most powerful tool, a person can have, because it is not just an information stored in books and on the internet... It is the ability to understand, and apply what we learn in real life. That is what I think knowledge is a lifelong process. We never stop learning and discovering new skills or knowledge. And I think, learning is like an ocean, because there is no limit.
